

Year Four Maths – Summer Term

In maths, children spend three days each week looking at a number aspect of maths and the other two days are spent focusing on another area of the maths curriculum. Below are some of the aspects of maths covered in Year 4 and some useful ideas to help your children at home.

Place Value – read Roman numerals to 100. (I to C).

Your child will be learning to read Roman numbers up to 100. They will be exploring patterns within the roman numeral system.

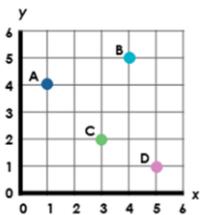

I	V	X	L	C
1	5	10	50	100

Addition and Subtraction – estimate and use inverse operations to check answers to a calculation.

An inverse operation is a maths skill that can be solved by doing the opposite version of the calculation. This is an important mathematical skill to help children check their answers independently.

For example: to check the answer to $1348 + 35 = 1383$, your child could calculate $1383 - 35$ to check they get the number 1348.

Geometry – position and direction – describe positions on a 2D grid as coordinates in the first quadrant.

We will be learning to read coordinates on the first quadrant by reading the x coordinate first and then the y coordinate.

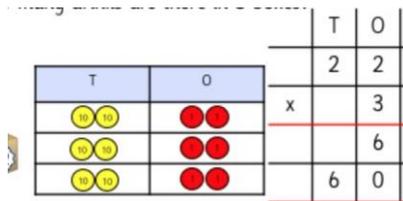

For example, the coordinates for the green dot (c), is (3,2).

Fractions (including decimals) – round decimals with 1 decimal place to the nearest whole number.

Your child will be modelled the use of a number to round decimal numbers. They will be encouraged to think about the halfway point between to whole numbers to help round a decimal number either up or down.

Multiplication and Division - multiply two-digit and three-digit numbers by a one-digit number using a formal written layout.

Your child will be modelled the process of short multiplication alongside the use of concrete manipulatives such as place value counters.

Geometry – properties of shapes – complete a simple symmetric figure with respect to a specific line of symmetry.

A line of symmetry is a line that cuts a shape exactly in half. This means that if you were to fold the shape along the line, both halves would match exactly.
